INDUSTRIAL VACUUM CLEANER VENTOS 32

THE COMPACT AND MOBILE POWERPACK FOR A COMPREHENSIVE CLEANLINESS

VERSATILE, POWERFUL AND COMFORTABLE

Whether at the construction site or in the salesroom or in the workshop, whether in combination with power tools or for sucking up liquids: The Ventos 32 is ideal for all cleaning tasks. An automatic start-up, an automatic switch-off in case of the suction of liquids and the large drain plug ensure safe operation. The extra-long power cable and the suction hose offer a large action radius, and a wide range of accessories enables a thorough work.

CONTROL PANEL

For a continuously adjustable suction power, with integrated socket for connecting power tools. The automatic start-up switches the vacuum cleaner on when the tool is switched on, the overrun function ensures the complete draining of the suction hose after switching off the power tool.

PUSH-CLEAN FILTER CLEANING

Simple filter cleaning by pushing a button. By pushing the button on the top of the unit the airflow will be directed through the dust filter to clean it and to restore the full suction power. The dirt falls into the collection container or into the dust bag and can be conveniently disposed of.

PRINCIPLE OF ARRANGEMENT

This means that the accessories are always within reach. Power cable and suction hose can be spooled and stowed easily. A semicircular holder on the top, into which the suction tube can be placed, allows that the Ventos 32 can be carried comfortably by holding the suction tube securely in the recess of the grip.

THE RIGHT EQUIPMENT FOR ANY REQUIREMENT

Whether you need to clean hard-to-reach areas or large surfaces: With the standard accessories, the Ventos 32 is already optimally equipped for the most common cleaning tasks. Our optionally available range of special accessories meets the highest requirements and particularly demanding tasks. All accessories are of course compatible with all existing Ventos models.
