

## Features

A swivel boom is mounted in the middle above the area where cleaning will take place to allow the operator continuous 360° movement around the item being washed.

It eliminates hose being dragged along the floor, increases productivity and reduces the potential damage to vehicles, mud flaps and side mirrors by the hose hooking onto the vehicle.

- Ideal for use in Carwash, service stations and industrial applications
- Prevents damage to the high pressure hose and gun
- Neat and professional appearance
- Low maintenance thereby reduces costs
- Corrosion resistant stainless steel
- Increase profit by increasing productivity
- Option of high pressure and foaming - double boom
